CiCONTINUITY AWS BACKUP SERVICES

**SECURE YOUR CLOUD. RECOVER WITH
CONFIDENCE.**

CiContinuity

aws Backup Service

YOUR CLOUD DATA DESERVES MORE THAN HOPE. IT NEEDS ASSURANCE.

AWS gives you a powerful, scalable cloud platform. However, according to the AWS Shared Responsibility Model, **you** are responsible for protecting your data. That's where **CiContinuity AWS Backup** steps in.

Whether you're facing ransomware threats, accidental deletion, or compliance challenges, our backup solution ensures **you stay in control**.

Built for Security. Optimised for Recovery

CiContinuity AWS Backup, powered by Veeam, delivers next-level data protection and fast, flexible recovery for your AWS environment.

Key features:

- **Immutable, Encrypted Backups** – Protect against tampering and deletion.
- **Policy-Based Automation** – Set it and forget it with smart backup rules.
- **Cross-Region Recovery** – Restore data across platforms and geographies.
- **Self-Service & Managed Options** – Choose the model that works for you.
- **Support for Full AWS Stack** – EC2, RDS, Redshift, FSx, EFS, DynamoDB, VPCs.

Manage It Your Way

Prefer to keep things in-house? Or need a helping hand getting started?

- **Self-Service** – Easy setup, intuitive portal, wizard-driven restore
- **Onboarding Support** – Our certified continuity experts guide you through every step of the setup process

Either way, you'll be up and running in days, not weeks.

Trusted by Teams Like Yours

'Easy to use, quick to set up, and gives us peace of mind knowing our AWS data is protected.'

CIO, UK-Based Public Service Provider

'A flexible solution that scales with our needs – and fits our budget.'

Head of IT, A Leading Financial Services Firm

CiContinuity benefits
